Executive Summary

This survey is designed to document member experiences and satisfaction with the behavioral health care that Mercy Care Plan Dual/SNP members and LTSS members receive. Results will be used to evaluate staff performance, identify gaps in service and key items that are causing dissatisfaction so that action can be taken to improve member experiences. Below is a summary of the findings.

- 79% are satisfied with the services they receive.
- 84% would tell others to use the health plan.

Background

Quality and continuous improvement are essential components of the Mercy Care Plan operational strategy. Members are encouraged to provide feedback regarding their health care and services. In an effort to enhance this activity Mercy Care Plan participated with a project led by National Medicaid Quality Management Team, which was approved by AHCCCS, to implement a member survey specific to behavioral healthcare and services. The cross-functional national team represented nine Health Plans, including clinical expertise from both behavioral and physical health care services.

The resulting survey is designed to help Mercy Care Plan better understand the experience and the challenges members have in using their behavioral healthcare services. By engaging members, Mercy Care Plan can work toward making the member Behavioral Healthcare experience more productive and satisfying resulting in better outcomes.

Purpose

The purpose of this exercise is to solicit member feedback about their experience with behavioral health care services. The survey assesses the following areas.

- Access to and timeliness of behavioral health care.
- Perceived outcome of behavioral health care.
- Communication with clinicians.
- Patient rights.
- Member services and assistance.
- Overall rating of the behavioral health care provider (BHCP).
- The trend from 2016 to 2017. (The survey questions were revised for this survey year and AHCCCS was notified of the changes. For all questions, “doctor” was replaced with Behavioral Health Care Provider, BHCP.)
- Comparisons between Adults vs. Children and lines of business (LTSS vs. Duals Demo vs. DD).
Methodology

Member Survey

Decision Support Systems (DSS) was selected by Mercy Care Plan to conduct its Behavioral Health Dual/SNP and LTSS Member Satisfaction Survey. Both adults and children were included in survey outreach. Adults were defined as members aged 18 and older. Children were defined as aged 13 and younger. Children age 14-17 were mailed a survey but no telephone follow up call was conducted to ensure the right to privacy of this age group.

Data collection was conducted by mail and telephone. First, a mailed survey was sent with a postage-paid reply envelope and cover letter explaining the purpose of the survey. Survey materials were sent to all members in both English and Spanish. Surveys for children were sent to the parent/guardian. If a member expressed a desire to complete the survey in another language, Mercy Care Plan provided the survey in that language via phone or mail to that member.

DSS interviewers then conducted live telephone outreach to those who did not respond to the mailed survey. All data were collected via computer-aided telephone interviews (CATI) by DSS in Fort Worth, Texas. CATI is a telephone surveying technique in which the interviewer follows a script provided by a software application. The survey duration was approximately seven minutes. Telephone survey outreach for child members was conducted with the parent/guardian. Participants had the option to complete the phone survey in English or Spanish. If a member requested another language, Mercy Care Plan arranged for a language translator to complete the telephone survey in the language as requested by the member.

The data collection schedule was as follows:
- Telephone follow-up conducted: October 5 – November 17, 2017.
- Data collection cut-off: November 17, 2017.

DSS securely received a file of members for outreach from the Mercy Care Project Manager. Eligible plan members were defined as:
- Currently enrolled Dual/SNP members and LTSS members.
- Had at least three visits from a BH specialist.
- Adult: 18 years old or older as of the date of survey outreach.
- Child: 13 years old or younger as of the date of survey outreach.

Member addresses were run through the National Change of Address database to ensure that DSS had the most current addresses available.

DSS also attempted to obtain a valid phone number for records that were missing a phone number or had an invalid phone number. DSS used a 3rd party service called Relevate to do...
this. Numbers are not always able to be located/updated. Only unique telephone numbers were called.

We received 213 (208 adult, 5 child) returned undeliverable mail pieces. (NOTE: As long as the member had a useable telephone number, he or she was contacted by telephone.)

**Response Rate**

**Response Rate: 19.6%;**

\[
\text{Response Rate} = \frac{\text{Number of Completed Surveys}}{\text{(Members sampled for outreach – Ineligibles)}}
\]

- Eligible sample received: 4,149
- Members sampled for outreach: 2,000
- Sampled members determined ineligible: 11
- Eligible members sampled: 1,989
- Completed surveys: 389 total (373 adult / 16 child)
  - 218 phone (203 adult / 15 child)
  - 171 mail (170 adult / 1 child)

Response rate is defined as the total number of completed surveys divided by all eligible members of the sample. To be considered “complete” and included in the analysis, the member had to respond to the mail survey (answering at least one question) or answer at least one question in the telephone survey.

Eligible members include members available for outreach minus ineligible members. Ineligible members met at least one of the following criteria: were mentally or physically incapacitated or were deceased.

The number of completed surveys represents a statistically valid sample (90% confidence, +/- 3.2% MOE, p=0.8, using a finite population correction factor based on the sample received, 14,941).

All calculations in this report use the “base” (shown as n=XX) as the denominator. Responses such as “Do not know” and “Prefer not to answer” are excluded from the base.

Totals reported on graphs may not be equal to the sum of the individual components due to the rounding of all figures to whole numbers.

Percentages lower than five percent are not labeled in charts or graphs where space does not permit.
Indicators/ Goals

Member Survey

The numerator and denominator for all survey questions, both Adult and Child surveys, are described below:

**Numerator:** Member's ratings are measured using a 5 point scale using Strongly Disagree, Disagree, Neutral, Agree and Strongly Agree. The numerator represents the number of eligible members who responded as either Strongly Agree or Agree.

**Denominator:** The denominator represents the number of valid responses collected for the measure.

**Goal:** Comparison 2016-2017

Audit Population

Member Survey

The survey is administered to those members who received behavioral health services as identified through three or more administrative claims for behavioral health services in the past 12 months. Paid and denied claims are included. A combination of diagnosis code, procedure code and provider specialty is used to identify the population. Qualifying claims have a provider which is behavioral health related, defined by using key words/terms from the provider specialty description in QNXT an integrated information management system. This includes both the primary and secondary specialties for a provider. The population is limited to members who are active at the time the report is generated. The population is further divided into age groups adults, ages eighteen and older, and children under fourteen years of age.

DSS receives a secure a file of members for outreach from the Mercy Care Project Manager in cooperation with the Mercy Care Plan staff. Eligible plan members were defined as:

- Currently enrolled
- Primary coverage through Medicaid/Medicare
- Adult: 14 years old or older or 18 years or older as of the date of survey outreach
- Child: 13 years old or younger as of the date of survey outreach
- Had at least 3 visits with the BH provider/ practitioner at least once within the past 12 months.
Results

Member Survey

Objectives. This research assesses the following areas:

- Access to and timeliness of behavioral health care.
- Perceived outcome of behavioral health care.
- Communication with clinicians.
- Patient rights.
- Member services and assistance.
- Overall rating of the behavioral health provider.

As noted in the table above, MCP has noted declines in the Adult member satisfaction for nine questions from 2015 through 2017. The MCP internal goal for member satisfaction is 80%.

- **Strengths:**
  - My BHCP treats me with respect.
  - My BHCP explains things in a way that I understand.
  - My BHCP is sensitive to who I am.
  - My BHCP helps me feel better.
  - My BHCP listens to me and understands what I say.

- **Opportunities:**
  - Helping members do better in school, work or other daily activities.
  - Helping members get along better with family and friends.
  - Agreement that members would send their friends or family to their BHCP.

<td>90.9%</td>
</tr>
</tbody>
</table>
MCP also reviewed the Child Survey and determined that while the denominator of respondents was significantly smaller, overall, the results also appeared to be positive.

The MCP internal goal for member satisfaction is 80%.

- **Strengths:**
  - My BHCP treats me with respect.
  - My BHCP explains things in a way that I understand.
  - My BHCP is sensitive to who I am.
  - My BHCP helps me feel better.
  - My BHCP listens to me and understands what I say.

- **Opportunities:**
  - Helping members do better in school, work or other daily activities.
  - Helping members get along better with family and friends.
  - Agreement that members would send their friends or family to their BHCP.

**Qualitative Analysis**

Through MCP’s analysis of the results, potential factors contributing to the results may include:

- Perception by members that their provider should be more available/that wait times are excessive (even if they are within the AHCCCS required timelines)
- Members may not realize that the BHCP and PCP communicate and do not discuss their BH issues with their PCP.
In general people do not respond to surveys.

**Barriers**

Potential barriers include:

- Members do not understand the appointment time requirements for BH and are therefore dissatisfied with appointment availability/scheduling.
- Behavioral Health doctors have requirements to coordinate with PCPs and this is audited through the AMRR process. PCPs are not as compliant with sharing information with other providers.
- Low number of children receiving BH treatment in this population and low response rate for Childrens survey (16 respondants, 15 completed via phone follow up.)

**Opportunities for Improvement**

Brainstorming or analysis does occur in collaboration with specific departments, BH managers and staff for both ALTCS and Medicare, Marketing and Member Communications, Office of Internal and Family Affairs (OIFA), Adult and Childrens Systems of Care, Provider Relations. Opportunities for improvement are identified for those areas that can be directly impacted by case management or BH staff, member outreach and peer supports. Other interventions are applied to areas that cannot be directly impacted related to the identified barriers. Recommendations for interventions and plans for implementation are included.

This year, MCP will utilize a multitude of methods to share information and education with both members and providers.

</table>

**[Mercy Care Plan]**
Opportunities for Improvement: meetings, by peer champions, in Kiosks at FQHC’s and integrated clinics, during provider forums, as a webinar, during provider onsite visits, within committees, during “Welcome to Mercy meetings and with member advisory councils.

Persons responsible: BH managers (ALTCS and MCA), Systems of Care both Child and Adult, OIFA, peer champions, provider relations, case managers, care managers, member services.

Status Update: approval of member newsletter. Anticipate end of June or beginning of July 2018.

Re-Measurement

The survey will be conducted annually with re-measurement and comparison to previous survey findings occurring in late 2018/early 2019.

New Survey question:

One new question was added related to “other self-help support and community services”. The outcome of this questions was:

66% of Adults surveyed agreed that other self-help support and community services were provided.

78% of Children/Parents agreed that other self-help support and community services were provided.

These services include:

- Other groups/support/meetings
- Food bank
- Assistance in job training/finding employment
- Home health/home assistance/in home care
- Receiving services at school

Another question added related to “I see my BCHP and PCP at the same location”
Since PCP’s may treat ADHD, Anxiety and Depression this may be a difficult question for members to answer or understand. Additionally with expansion of integrated health homes, members may again be confused by this question.

Conclusion

The objective of conducting and analyzing this survey was to obtain information regarding member experiences with utilization of behavioral health services and identify opportunities for improvement, and this objective has been met.

Action / Interventions

As noted above

Let us know what’s important to you so we can make your care better

Dear Member,
At Mercy Care Plan, we design our benefits and programs to match what’s important to our members. After all, you and your family are at the center of everything we do. So today, we want to hear from you.

Take our survey and tell us about your experience with our behavioral health services. This is care for mental or emotional concerns. Your answers will let us know if your needs are being met. And we’ll use your input to improve care for the future.

We hired DSS Research to do this survey. Along with questions about your care, DSS will ask you about your behavioral health doctor. This kind of doctor can be a:
- Counselor
- Therapist
- Psychologist
- Psychiatrist

Your doctors and health care providers will never see your answers. And your answers will not change your health plan benefits and services in any way. This includes your behavioral health care plan.

This survey should take less than 15 minutes. Simply complete the form and mail it back to DSS by <<Date>>. Use the return envelope provided by DSS. It doesn’t need a stamp.

Have questions?
We can help. Just call us toll-free at 1-800-624-3879. If you are deaf or have difficulty hearing, call 7-1-1. Also keep in mind that you don’t have to respond to the survey.

Thank you for helping to make health care better for everyone!

Sincerely,
Member Services
Mercy Care Plan
Díganos lo que es importante para usted, para que nosotros podamos mejorar su atención

Estimado/a Miembro,

En Mercy Care Plan, diseñamos nuestros beneficios y programas para satisfacer lo que es importante para nuestros miembros. Después de todo, usted y su familia se encuentran en el centro de todo lo que hacemos. Así que el día de hoy deseamos escuchar de usted.

Conteste nuestra encuesta, y díganos sobre su experiencia con nuestros servicios para la salud del comportamiento. Esto es, atención para problemas mentales o emocionales. Sus respuestas nos dejarán saber si sus necesidades están siendo satisfechas. Y nosotros usaremos sus opiniones para mejorar la atención para el futuro.

Nosotros contratamos a la empresa DSS Research para hacer esta encuesta. Además de las preguntas sobre su atención, DSS le preguntará sobre su doctor de la salud del comportamiento. Este tipo de doctor puede ser:

- Asesor/a
- Terapeuta
- Psicólogo/a
- Psiquiatra

Sus doctores y proveedores del cuidado de la salud nunca verán sus respuestas. Y sus respuestas no cambiarán sus beneficios y los servicios del plan de salud en forma alguna. Esto incluye a su plan del cuidado de la salud del comportamiento.

Esta encuesta le debe llevar menos de 15 minutos. Sencillamente llene la forma y envíe la por correo de regreso a DSS antes de <<Fecha>>. Use el sobre de retorno provisto por DSS. No necesita estampilla.

¿Tiene preguntas?
Nosotros podemos ayudar. Sólo llámenos al número de larga distancia gratuita 1-800-824-3879. Si usted está sordo/a ó tiene problemas auditivos, llame al 7-1-1. También tenga en mente que usted no tiene qué contestar la encuesta.

¡Muchas gracias por ayudarnos a mejorar el cuidado de la salud para todos!

Atentamente,

Servicios al Miembro

Thank you for taking our survey. Have a good day.

Spanish Questions

Para cada pregunta por favor dígame qué tan fuertemente está de acuerdo o en desacuerdo respondiendo usando las siguientes selecciones: Muy de acuerdo, De acuerdo, Estoy neutral, En desacuerdo, Totalmente en desacuerdo. Si la pregunta no es aplicable a usted, por favor dígamelo. (Entrevistador/a: repita la escala si es necesario.)

Muy de acuerdo
De acuerdo
Estoy neutral
En desacuerdo
Totalmente en desacuerdo
No aplica (N/A)

EL CUIDADO DE SU SALUD
1. Yo tengo a un Proveedor del Cuidado para la Salud del Comportamiento (BHCP por sus siglas en inglés) en una buena ubicación.
2. Yo puedo obtener una cita tan pronto que la necesito.
3. Mi BHCP me escucha y entiende lo que le digo.
4. Mi BHCP me explica las cosas en forma tal, que yo las pueda entender.
5. Mi BHCP me trata con respeto.
6. Mi BHCP es sensible con respecto a quién soy yo, incluyendo mi raza, religión, origen étnico, identificación de género/sexo, idioma, o discapacidad.
7. Yo veo a mi BHCP y a mi doctor regular en el mismo lugar.
   Sí  No
8. Mi BHCP y mi doctor regular comparten información sobre mi plan de salud y tratamiento.
9. Mi BHCP me ayuda con otros servicios de apoyo de autoayuda y comunitarios.
   Por favor platíquenos sobre estos otros servicios:

10. El personal de la oficina es amable y de gran ayuda.
11. Mi BHCP trabaja en mi plan de tratamiento conmigo, con mi familia y con mi equipo de atención.
12. Mi BHCP habla conmigo sobre mis medicamentos y los riesgos que éstos puedan presentar.
13. Mi BHCP me ayuda a llevarme mejor con mi familia y amigos/as.
14. Mi BHCP me ayuda a desempeñarme mejor en la escuela, el trabajo u otras actividades cotidianas.
15. Mi BHCP me ayuda a sentirme mejor.
16. Yo enviaría a mi familia y amigos a ver a mi BHCP.
17. Yo estoy contento/a con mis servicios para la salud del comportamiento.
18. Por favor, díganos más sobre cualquiera de sus respuestas. ¿Qué le gusta sobre los servicios que está recibiendo? ¿Qué no le gusta? ¿Qué más necesita para mejorar su salud?

SU PLAN DE SALUD
20. Mi plan de salud me ayuda a obtener atención.
21. Yo les diría a otros que usaran mi plan de salud.

Mis últimas preguntas son sobre usted.

DEMOGRAFÍA
22. ¿Cuál es su raza?
   Indio/a americano/a o nativo/a de Alaska
   Nativo/a de Hawái o de otras islas del Pacífico
   Asiático/a
   Blanco/a (caucásico/a)
   Negro/a (afro americano/a)
   Otro (opcional), especifique

23. ¿Es usted hispano/a o latino/a?
   Sí
   No
24. ¿Cuántos años tiene?
   Menos de 18
   18-24
   25-34
   35-50
   51-6
   65 ó más

25. ¿Cuál es su género/sexo?
   Masculino
   Femenino

Muchas gracias por contestar nuestra encuesta. Tenga un buen día.

• Therapist
Your child may also see a Primary Care Doctor or Provider (PCP). A Primary Care Provider is a provider your child sees for physical health care. This includes health check-ups or routine care.

Hola, soy de DSS Research, una compañía nacional de encuestas de opiniones. Estoy llamando a nombre de <<INSERT HEALTH PLAN NAME>>. Estamos llamando para preguntarle acerca de la atención de salud conductual que su hijo recibió el año pasado.

Los servicios para el cuidado de la salud del comportamiento incluyen terapia y tratamiento para la salud mental y emocional. Esto también incluye terapia y tratamiento para el uso de drogas o alcohol. Estos servicios los provee un Doctor o Proveedor de Cuidado para la Salud del Comportamiento (BHCP por sus siglas en inglés). Un BHCP puede ser un:

- Consejero
- Terapeuta
- Psicólogo
- Psiquiatra
- Enfermero Practicante Médico

Su niño/a también puede ver a un Doctor o Proveedor de Cuidado Primario (PCP). Un Proveedor de Cuidado Primario es aquél proveedor a quien su niño/a ve para el cuidado de su salud física. Esto incluye revisiones de salud o atención de rutina.
